Student Testimonials

Training Partnership Ltd

The people who work at the TTPL have thought me the English diplomacy and work policy, by giving themselves as an example. For me, working here was the perfect opportunity to get in contact with a lot of people. Everyone treated me as an equal and I was immediately integrated in the staff group, which meant a lot to me, because it made it easier for me to adapt to the English culture.

I remember the first time I found out the TTPL needed a student for work placement, my immediate thought was : that's where I want to be ! And there I was !!!

Thank you for everything you have done for me and also for my group !

Andreea Bonciu - Romania

Administration 2006

My experience in the Gleneagles Hotel was very difficult at the first moment because my English level was very low, but my manager had patience with me and the same happened with the rest of the staff. Later when I improved my English level all was easier because I understood most things and had more work experience.

Definitely I am satisfied with my experience in the job and in general with my experience in England!

Eduardo Delgado - Spain

Hotel & Catering 2006

Torquay Boys Grammar School

I am a trainee in Torquay boys Grammar school. In this school I support my IT colleagues with the network, software and computer problems. I'm now helping my colleague Simon with all the computer, software and network problems.

Some of the things that we had to do where reinstalling software for some class rooms, replacing pc hardware and fixing some network connections to the pc's.

One of the big things that we had to do was setting up a classroom with pc's in it. First my colleagues started setting up the tables and the pc's, after that I helped them with the cabling of the pc's. We form a good team.

Information Technology 2006

I work at a new local radio station, called Palm FM. It is 40 minutes walking from my student house, The Kintyre Residence (I know, it's long walk, but it keeps me fit). There I work together with Darren (one of the radio presenters) to improve and manage the computer systems and the network. I feel very welcome there and there are all nice people. After the first few days I got used of talking English all day and I had the feeling I understood people better and quicker. So believe me, you have to do your training in England if you want to improve your English! The first few weeks were very busy.

Tom Donker - Dutch
Information Technology 2006

At West Country Housing Association I currently work on a project for a data survey. I am designing and creating a form that will be send out to the households. when the households complete and return the form it will get scanned. When it gets scanned the answers will be converted to a structured format (.csv file). Then a program will let a user see if the data has been captured correctly and if it is, it will save it into the database. That is a part of the program I am working on.

Some of the other things I do:

Some of the helpdesk when my colleague's are busy with other things.

Travelling sometimes with my colleague's to some of the smaller sites when they have problems,

Learning programming in progress,

Dealing with spam.

Michel Hendriks - Dutch

Information Technology Student

For me work was a great opportunity to work in a company like Reuters. All the staff was wonderful because I have colleagues from all over the world. I learned many things about financial markets and I think this experience will help a lot to find a good job in Romania in this area.

The Training Partnership Ltd helped my during my practice. They had a very important role in my placement in family and in company.

TTPL organised great parties where I met other students and we create friendships between us. They supported me in my activities and gave to me advice concerning my problems. I can say that the TTPL staff was like a family for me!

I have been working with the structure department and I can say I have learnt a lot. They have tried to give me work all the time so it was good for me.

With the Training Partnership I am also very glad. I think meetings and the parties are really useful because you can meet foreign people so you can improve your English and you also enjoy a lot the parties.

I also want to say the partnership's girls are very nice with us.

Structure, Installation & Design Student

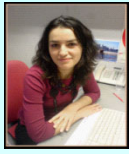

Before coming to England I had some concerns about this 3 months but now I am very happy because I had a fantastic experience and a great opportunity to work, to learn, to make friends and to visit beautiful places.

I think that my working experience is the best thing that happened to me in UK. I worked in a very friendly and professional environment with a great team formed by people that I admire very much and that I had a lot to learn from. I reached all the targets I had and now I can say that I am more confident and more efficient than before.

On the other hand, I want to say that I am very glad that I got to know better the people working for The Training Partnership Limited. They are wonderful persons and because of them now I know how a real team looks like. They showed us every moment that they really cared about us, they solved every problem we had and they made our stay to be great. I appreciate very much their help, generosity, patience, support and their friendly smile and I would like to thank them for all.

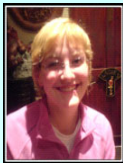

Daniela – Romania
Human Resources Student

The Training Partnership are a bunch of professional, friendly and lovely people, who put themselves at the disposal of students and go to extensive lengths to understand and meet their needs. Their efforts have undeniably helped me better integrate in this new environment; they've been like a small, yet big family away from home.

What I have learned the most from this experience is that work is not necessarily about ... well, work, but more important, it's about the people you meet and come in contact with, the friends you make, the bonds you tie.

Marketing Student 2006*

My colleagues are very nice and they were welcoming. I really enjoy my work which is very interesting (creating databases, scanning documents, typing letters, assisting appointments...).

My tutor offered me an English breakfast in a restaurant. I was also at the Chamber of Commerce Lunch and I will go at the Christmas Lunch. It was very interesting work experience and I improved my English.
